

# App Pairing Instructions for IOS and E-tab

Applicable to all Element4 Club eSeries models

English

# E-Tab Controller:

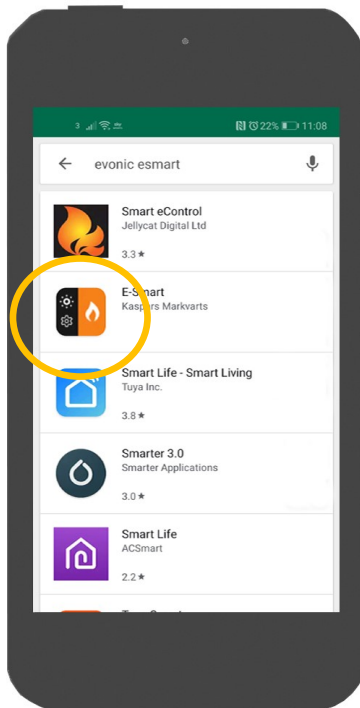

1. Volume control
2. Power Button—Press and hold for 3 seconds to turn **ON/OFF**
3. **USB** charging point
4. **USB** connection lead and plug socket

The e-smart app can be used with both smart phone and tablet devices.

Utilising the e-smart app will allow complete controllability of your Evonic product.

To download the Evonic e-smart app please follow the below steps.

1. Access either the Apple app store or Google play, this is depending on the operating system of your smart phone or tablet.
2. Search, locate, and download the app entitled evonic e-smart.

**Please note: E-Tab control system comes with e-smart app already installed**

# Connecting a device to an Element4 product:

Fig 1.

Fig 2.

Fig 3.

Fig 4.

3. Once your appliance has been installed and turned on, go to the wi-fi settings on your device and select the fire. Each fire has a unique Wi-Fi settings name which you can find in the table below. This will connect your device to the fire. Fig 1.

4. Open your E-Smart app, and in the settings panel ( Fig 2.) establish your connection by selecting your home wi-fi. This will pair the fire with your router. Fig 3.

5. Your evonic product will now be paired and ready to operate.

6. Under the settings panel located in the app, you can now change the name of your fire. Ensure you enter your e-mail address, as this is to identify between the fireplace and you. You can also change units of temperature. Fig 4.

**Table 1.**

Name of Fireplace	Configuration	Name Wi-fi Network
Club 80e	F/C/3S	Tyrell
Club 100e	F/C/3S	Kalmar
Club 100e	T	Lindstrom
Club 150e	F/C/3S	Linnea
Ovation e		Halden

# Selecting your fire:

1. Once your product is paired, open the app. The above screen will appear with your fire shown. Single press **Kalmar**. **Please note:** It may take a few minutes for your fire to appear on the screen.
2. Single press the **flame** icon to turn on the lights.
3. Single press the **heater** button to turn on the heater

# App Control Overview:

- A). **Target Temperature**—This displays the desired room temperature.
- B). **Temperature Control**— Temperature adjuster. Press, hold and swipe to adjust.
- C). **Animation setting**— Displays selected animation. Single press arrow to reveal drop-down menu.
- D). **Side Lights**— Single press to turn on side lights.
- E). **Lighting**—Single press to turn on/off the fuel, flame & overbed lighting.
- F). **Flame**— Slide left or right to adjust brightness of flame.
- G). **Fuel**— Slide left or right to adjust brightness of fuel bed.
- H). **Speed**— Single press to adjust the speed of selected animation.

# Pairing with Alexa:

1. Once you fire is installed and fully functioning, download the Amazon Alexa app.
2. Configure your echo with the Amazon app by adding device.
3. On the home screen, you will see a menu icon in the top left hand side. Single press to open the menu and select 'skills and games'
4. Once open, in the top right corner search 'evonic' and the below skill option will appear. **Fig 1.**
4. Single press to select skill, which will then open up the below page. **Fig 2.**
5. Once you press '**ENABLE TO USE**', you will be directed to the evonet page.
6. To complete pairing, Input the evonet account details you registered earlier in the e-smart app setup. You fire is now paired with Alexa.

# Problem Solving:

1. **e-smart app will not connect to product and is continuously showing the below screen:** Please follow the below steps.

1. Force close the app by pressing the square at the bottom of your phone/e-tab. Then attempt to re-launch the app.
2. Ensure that the rocker switch is in the **ON** position, and re-scan for the product.
